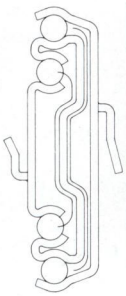
# Over 60 Years of Commitment to Quality

# MAGNUM PLUS CHESTS & CABINETS

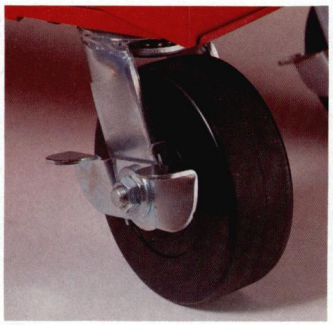
## 50212SS/50108SS MAGNUM "PLUS" 34-INCH WIDE CHEST AND CABINET COMBO

At last, a twelve drawer chest and eight drawer roller cabinet combination that has full extension roller bearing slides on all full width drawers at a price anyone can afford.

Look at all the "PLUS" features at the lowest price in the industry for this kind of quality.



- Roller bearing slides with four levels of balls for effortless silky smooth operation, regardless of the load factor.
- Patented wiper controls on slides that prevents dirt and sludge build up and virtually eliminates dragging and sticking.
- Inside slide carriers are welded to the top, back, front, sides and bottom for the strongest construction in the industry, can not warp out of square.



- New needle bearing axle casters that are 6″ × 2″, made of hard rubber. Allows units to be moved easily over rough and uneven as well as soft surfaces, including vinyl and carpets; won't fall through floor grates.

- New unique "Bolt-In Universal Divider Set" for chest and cabinet drawers that allow you to customize your tool arrangement to fit your needs can be bolted in right to left or front to back; no welded in dividers that won't meet your demands and get in the way.

The **50212SS** and **50108SS** overall and drawer dimensions are the same as those listed for **50212** and **50108** units on page 13. The weights are as follows: **50212SS - 168 lbs.; 50108SS - 247 lbs.**

- Full length deluxe drawer pulls for ease of operation, regardless of angle of pressure.
- Triple wall construction on roller cabinet increases load factor by 25%.
- Double bitted pick resistant tumbler lock improves your security and helps keep strangers out.
- New extra heavy duty tote tray in chests helps organize tools or allows for portability on the job.
- When you look at all the regular Magnum features "Plus" the new ones, you will have to agree that no one offers a better product at any price.

# MAGNUM PLUS CHESTS & CABINETS

## 50103SS MAGNUM "PLUS" 34-INCH WIDE STEP UP CHEST

This step-up chest is designed to work with the 12-drawer chest and/or 8-drawer roller cabinet shown on page 2 and is completely equipped with roller slides as well. These roller slides allow effortless operation with maximum load bearing capabilities. All drawers are supported with double level ball bearing slides, positive wiper control to prevent dirt build up and virtually eliminates dragging and sticking.

| | Width | Depth | Height | Weight | Capacity |
|---|---|---|---|---|---|
| 50103SS | 33 7/16″ | 18″ | 13 15/16″ | 84 lbs. | 4,217 cu. in. |

- Kan't Slip design with top rail to capture chests, weld nuts in chest bottom, mounting bolt-through holes in top provide a solid tie-in stackable unit.
- Slide carrier welded to top, bottom, sides and front to increase vertical strength and to maintain structural integrity, will not warp out of square.
- Front locking, double wall panel provides extra security as well as an additional work surface that will easily support 25 lbs. of parts and tools on an acid resistant, no-skid textured virgin vinyl material.
- Double bitted, pick resistant tumbler lock that secures panel with lever hidden in lock pocket.
- Full length deluxe drawer pulls for ease of operation, regardless of angle pressure.
- This is by far the best buy for your money in a full ball bearing slide, heavy duty 34″ wide three-drawer step-up chest.

## MAGNUM "PLUS" MOBILE TOOL CART

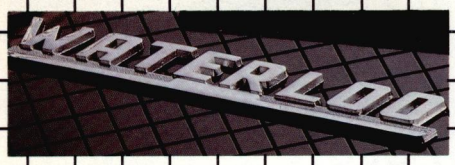
We are now offering two (2) new models of our mobile tool carts to help round out the extra heavy duty "Magnum Plus" line of tool boxes. (See page 19 for industrial version).

### 50710SS MAGNUM "PLUS" 10-DRAWER MOBILE TOOL CART

- Full 24″ front to back dimension with all drawers filling entire cavity for maximum storage and organization.
- Top narrower drawer is 4″ deep allowing mechanic to stand deep well sockets in an upright position.
- Bottom narrower drawer is 8″ deep, allowing storage for bulky hand tools and test equipment.
- Full width bottom drawer that is double reinforced to handle big heavy and long tools won't allow sag, drag or hang up, and still works smooth as glass when you open or close.
- Six by Two (6″ × 2″) needle bearing axle hard rubber casters allow ease of movement or travel over a long distance with a minimum amount of effort.
- Foot operated, over-center lock stand will immobilize this taco cart; the heavier the load, the tighter it holds.

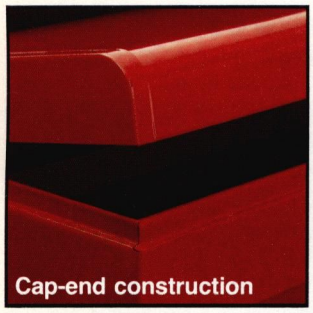
| | Width | Depth | Height | Weight | Capacity |
|---|---|---|---|---|---|
| 50710SS | 46″ | 24″ | *38 1/8″ | 393 lb. | 13,401 cu. in. |

• All drawers are built with "Quadra Level" ball bearing slides that provide the smoothest and easiest operating drawers in the industry. These four levels of ball bearings provide an almost limitless load factor and still work silky smooth. • Patented wiper controls on slides keep balls and races clean under the most adverse condition; such as dirt, heavy grease, sand and rust. Keeps on working with finger tip control. • Zerk grease fittings on both caster swivel collar and needle bearing axles maintain the life of these moveable parts almost indefinitely. *This measurement includes casters.



# CHEST FEATURES

**WATERLOO BUILT CHESTS ARE STRONG, CONVENIENT AND SECURE. HERE'S WHY:**



Cap-end construction

Staked piano hinge
Automatic locking system

Quality crafted drawers

Recessed drawers
Extra large weld tabs

**CAP-END CONSTRUCTION** makes our chest covers stronger and more weathertight. They also help keep the chest square so drawers won't bind when loaded with heavy tools.

**STAKED PIANO HINGE** — The full-length piano hinge on each of our chests is staked at every other curl to work smoothly and help provide security from theft.

**LIMITED TRAVEL SIDE HANDLES** — The heavy-duty nickel plated side handles on our chests have positive stops which prevent them from rising above 90 degree angle. This feature, along with an extra large grip, make our chests easier to move. You don't have to worry about our handles hurting your knuckles or digging into your fingers.

**QUALITY CRAFTED DRAWERS** — We roll or hem all exposed edges on our chest and cabinet drawers to increase strength and help prevent hand injuries. We've also included an independently locking top center security drawer on many of our chests so you can safely store valuable tools and personal items while you work.

**"T" SHAPED DRAWER FRONTS** make the drawers 25% stronger and allow easy opening from any angle.

**EXTRA LARGE WELD TABS** — Extra welding surface means extra strength — up to two or three times stronger where you need it most — on all critical stress points.

**QUALITY TUMBLER LOCK** and two milled keys are standard features on all of our chests and cabinets. Your tools are safer stored in Waterloo products.

**SURE-GRIP HANDLE ON TOTE TRAY** is full length and shaped so it won't rotate in your hand. This makes the tray easier to carry and helps prevent spills.

**AUTOMATIC LOCKING SYSTEM** — As soon as you close the drawers and cover on a Waterloo chest, the drawers are securely locked. We've built in heavy-gauge steel lock bars that automatically lock in all closed drawers with the action of closing the cover.

# PROFESSIONAL CHESTS

**WI-600 6-Drawer Chest**

- Our best selling chest
- Ideal for your general needs
- Top center drawer locks independently

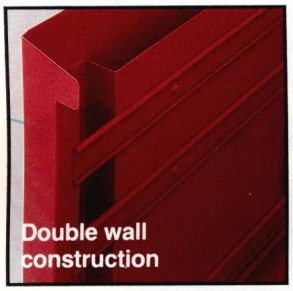
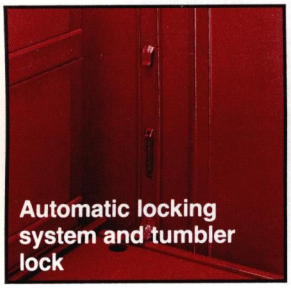
# ROLLER CABINET FEATURES



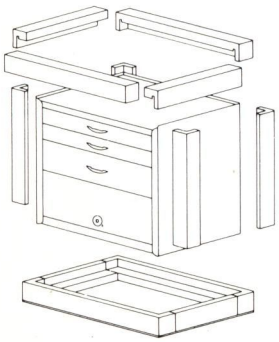
Double wall construction

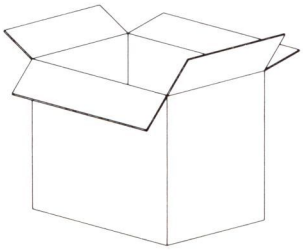
Smooth action draw slides



Automatic locking system and tumbler lock

Extra wide corner-posts





**ROLLER CABINETS BY WATERLOO — WE TAKE CARE OF DETAILS SO YOU CAN GET DOWN TO BUSINESS**

*These features apply to the Industrial Roller Cabinets as well

When you want to get to work the last thing you need is trouble with a roller cabinet. That's why we design every detail of our cabinets to provide years of hard hassle-free service. Here are some of the reasons why our cabinets work so well:

**RIBBON EMBOSSED TOP** adds strength to the cabinet and keeps your round tools and parts from rolling off the cabinet.

**HEMMED EDGES** on the sides, back and bottom of our cabinets add rigidity and eliminate sharp edges so you don't have to worry about scrapes and cuts.

**NEWLY DESIGNED STURDY SIDE HANDLE** end caps are nickel plated for durability, and the handle is wide and strong enough so you can move the cabinet even when heavily loaded.

**DOUBLE WALL CONSTRUCTION** — We use a double wall of heavy gauge steel on our chests and cabinets. This type of construction adds strength, provides a secure mounting surface for the drawer slides, and helps keep the drawers sliding freely if the outside of the cabinet becomes damaged.

**SMOOTH ACTION DRAWER SLIDES** — We form all of our drawer slides from one piece of steel and lubricate them at the factory to make sure they work smoothly without binding under heavy loads.

**V-RIBS AND CRISS-CROSS EMBOSSING** — We've increased the strength and rigidity of our cabinets without increasing weight or cost by embossing the back and bottom. Our exclusive V-rib bracing on the back and criss-crossed bottom help keep the cabinets square under extra heavy loads.

**AUTOMATIC LOCKING SYSTEM AND TUMBLER LOCK** — The action of pulling down the cover over the bulk storage compartment automatically triggers the double-bar locking system securing all cabinet drawers. Just turn one lock and your entire roller cabinet is secure.

**EXTRA WIDE CORNER POSTS** — The corner posts on most of our cabinets are 1½" wide and U-shaped — wrapping around inside the frame for extra strength. You'll appreciate this extra strength when your chest and roller cabinet are loaded with heavy tools.

**CASTER CHANNELS** — Heavy gauge caster channels are provided on each cabinet to insure proper function under heavy loads.

**"T" SHAPED DRAWER FRONTS** make the drawers 25% stronger and allow easy opening from any angle.

DIMENSIONS OF ROLLER CABINETS in this catalog are as follows: width is left to right; depth is front to back; height is top to bottom. All measurements are given without hardware and casters. Weights given are shipping weights. Dimensions and weights are subject to change without notice.

**Advanced Packaging**

Considered to be the best in the industry, our packaging design for chests and roller cabinets protects corners, sides, top and bottom of the product with polystyrene packaging material inside a sturdy corrugated carton.

# PROFESSIONAL ROLLER CABINETS

**WI-300 3-Drawer Roller Cabinet**

- This roller cabinet fits your general use needs
- Designed to store small, medium, and large bulky tools and supplies
- Lock the panel compartment cover to lock all closed drawers

**10,620 cu. in. capacity**

| | Width | Depth | Height | Weight |
|---|---|---|---|---|
| WI-300 | 26⅛″ | 18″ | 30⅛″ | 92 lbs. |
| 2 drawers | 22¼″ | 16¾″ | 3⅛″ | |
| 1 drawer | 22¼″ | 16¾″ | 6½″ | |
| 1 compartment | 23½″ | 17⅛″ | 9¾″ | |

**WI-900 9-Drawer Roller Cabinet**

- Split drawers provide more storage space for tool separation
- Three different drawer sizes make organization easy
- An excellent choice for storage of small, medium, and large tools and supplies

**10,886 cu. in. capacity**

| | Width | Depth | Height | Weight |
|---|---|---|---|---|
| WI-900 | 26½″ | 18″ | 36″ | 142 lbs. |
| 4 drawers | 10½″ | 16¾″ | 3⅛″ | |
| 3 drawers | 22¼″ | 16¾″ | 3⅛″ | |

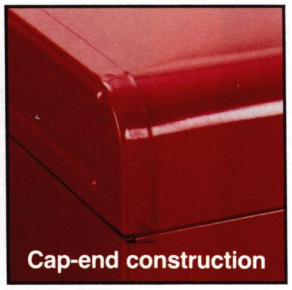
# HANDBOX FEATURES

**HERE'S WHY OUR HAND TOOL BOXES AND PORTABLE CHESTS ARE SO GOOD:**

Heavy-duty, comfort grip handle

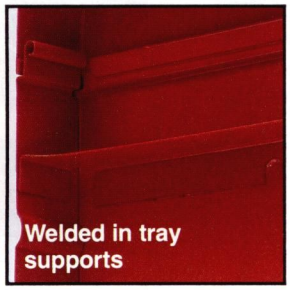


Cap-end construction

Watershed cover, staked piano hinge

Wide rolled front edge

Heavyweight hardware



Welded in tray supports

No matter what part of our product you look at, you're looking at quality. All metal surfaces, both inside and out, are protected by a rust-resistant, baked-on enamel paint finish. Every detail of hardware and construction has been refined to work smoothly and last longer for you. Here are some of the product features that add up to Waterloo's total value:

**HEAVY-DUTY, COMFORT GRIP HANDLE** — When you load your box with tools, lift and carry it, you'll feel the strength and comfort of our heavy duty handles. We rivet the handle hardware to the cover for strength and to prevent moisture from entering the box at this point.

**CAP-END CONSTRUCTION** on the cover and shell makes our boxes stronger and more weathertight. Cap ends give extra support to the bottom of the box so you can carry heavier tools. When you feel the weight of your tools in the box, you'll know how strong the box is.

**PROTECTIVE WATERSHED COVER, STAKED PIANO HINGE** — A special watershed design cover on all of our tool boxes protects the staked, full length piano hinge and strengthens the cover. This makes our boxes more weathertight and helps prevent dirt and rust from ruining your valuable tools.

**WIDE ROLLED FRONT EDGE** on most of our hand tool boxes adds strength and rigidity to help keep the shape of the box through years of hard use. Rolled edges mean you don't have to worry about sharp areas on your hand box.

**HEAVYWEIGHT HARDWARE** — Our hardware is not only heavyweight but heavily plated to help prevent rust. All of our boxes have positive lock drawbolts and either a padlock eye or hasp and staple for additional security. We make our boxes to stay closed until **you** want them to open.

**WELDED-IN TRAY SUPPORTS** — Our tray supports are small parts that yield big advantages. By supporting the tray they create a deep bed space for bulky tools. Both tray supports are welded to the front, back and side. This strengthens the box and keeps it square.

**SURE-GRIP HANDLE ON TOTE TRAY** is full length and shaped so it won't rotate in your hand. This makes the tray easier to carry and helps prevent spills.

**NOTE:**
DIMENSIONS OF TOOL BOXES AND PORTABLE CHESTS in this catalog are as follows: length is left to right; depth is front to back; height is top to bottom. Weights given are shipping weights. Dimensions and weights are subject to change without notice.

# MAGNUM CHESTS & CABINETS

**Designed By and for Mechanics and Maintenance Professionals**

For professional mechanics today, time is money. And mechanics know the best way to save time on the job is to have the right tools where you need them, day after day, year after year, protected from wear, tear, and theft. We listened to what mechanics had to say and built our new Magnum line to match their demanding needs.

We made these products **durable** by increasing the gauge of all critical steel parts, reinforcing tops, bottoms and sides and using big 5″ × 2″ wide casters. The result is tool storage that will last under your heavy use conditions.

We made the Magnum line **convenient** by adding full length drawer pulls for easy opening, moveable dividers for tailoring your tool organization and 100% extension drawers for easy access to tools stored in the back of drawers.

We made these chests and roller cabinets **secure** with special locking systems, providing an easy method for bolting combinations together, recessing cabinet drawers and designing panel edges to prevent prying the unit open.

Explore The Alternatives and discover the best — Magnum by Waterloo.

**Chest Specifications**

**59206 6 Drawer Chest**

26″W × 13¾″D × 16½″H
3 Drawers, 6⁵⁄₁₆″W × 11⅞″D × 1⅝″H
2 Drawers, 21¼″W × 11⅞″D × 1⅝″H
1 Drawer, 21¼″W × 11⅞″D × 2⅝″H
Top Tray, 25½″W × 12⅝″D × 2¾″H
Unit/Ship Weight 76/81 lbs.
Storage Capacity 3055 cu. in.

**59208 8 Drawer Chest**

26″W × 17¾″D × 20½″H
4 Drawers, 10⅛″W × 15⅞″D × 1⅝″H
3 Drawers, 21¼″W × 15⅞″D × 1⅝″H
1 Drawer, 21¼″W × 15⅞″D × 2⅝″H
Top Tray, 25½″W × 16½″D × 2¾″H
Unit/Ship Weight 117/121 lbs.
Storage Capacity 5122 cu. in.

1 Drawer, 21¼″W × 15⅞″D × 7″H
Unit/Ship Weight 174/179 lbs.
Storage Capacity 8940 cu. in.
Static Load Capacity 800 lbs.

**59110 10 Drawer Roller Cabinet**

26½″W × 18″D × 36″H
4 Drawers, 7″W × 15⅞″D × 2⅝″H
1 Drawer, 4¾″W × 15⅞″D × 5⅞″H
1 Drawer, 21¼″W × 15⅞″D × 2⅝″H
3 Drawers, 21¼″W × 15⅞″D × 3⅞″H
1 Drawer, 21¼″W × 15⅞″D × 7″H
Unit/Ship Weight 186/191 lbs.
Storage Capacity 8768 cu. in.
Static Load Capacity 800 lbs.

**50108 8 Drawer Roller Cabinet**

33½″W × 18″D × 36″H
4 Drawers, 28¼″W × 15⅞″D × 1⅝″H
2 Drawers, 28¼″W × 15⅞″D × 2⅝″H
2 Drawers, 28¼″W × 15⅞″D × 7″H
Unit/Ship Weight 212/217 lbs.
Storage Capacity 11,548 cu. in.
Static Load Capacity 1000 lbs.

# MAGNUM FEATURES

## Loaded with Features For Durability, Convenience, Organization and Security

**EASY BOLTING COMBINATIONS** — We provide weld nuts on the inside bottom of our Magnum chests, holes in the top of our Magnum roller cabinets and bolts so you can securely bolt your chest and roller cabinet together. The result is a single massive combination unit that is safer from theft and reduces liability. (59206 does not have this feature).

**18-GAUGE STEEL DRAWERS** are strong enough to prevent sagging when heavily loaded, without the use of permanent welded in drawer dividers that limit your tool organization.

**FULL HEIGHT, HEAVIER GAUGE SLIDE CARRIERS WITH STIFFENERS** You can't see this feaure unless you remove a drawer, but you'll be glad it's there. This feature is the inside wall of our TRIPLE WALL CONSTRUCTION. An 18-gauge steel wall ties the top to the bottom of each unit for added strength and rigidity to help assure easy drawer movement when heavily loaded.

**REINFORCED, IMPROVED SECURITY PANEL WITH GASKET CLOSURE** — This strong drop front panel completely covers the chest drawers and closes tight against the gasket to protect your tools from theft, dust and moisture. The top pivots on a full length piano hinge and the sides and bottom are designed with special edge braces to prevent entry with pry bars.

**HEAVY DUTY FULL LENGTH SIDE HANDLE** — Rounded handle gives you a comfortable secure grip when moving your tools

**DEEPER TOP TRAY FOR DEEP WELL SOCKET STORAGE** — Our new deeper top tray will hold deep well socket sets standing upright. Now you can customize your socket storage in one convenient location to save time on the job.

**CAP END CONSTRUCTION** makes our chest covers stronger and more weathertight.

**THREE-POINT LOCKING SYSTEM WITH DOUBLE BITTED LOCK** — The drop front panel locks in the center and on both sides at the bottom by turning a single key. The tamper resistant double bitted lock keeps your tools safer than single bitted locks.

**STAKED PIANO HINGE** — The full-length piano hinge on each of our chests is staked at every other curl to work smoothly and help provide security from theft.

**INCREASED DEPTH AND CAPACITY** — The 59208 and the 50212 are 10% deeper than the traditional heavy duty chest so you have more room to store tools and customize your organization.

**100% EXTENSION DRAWERS** make it easy to find tools stored in the back of drawers for full use of all drawer space.

**LIMITED TRAVEL SIDE HANDLES** — The heavy-duty nickel plated side handles on our chests have positive stops which prevent them from rising above a 90 degree angle. This feature, along with an extra large grip, make our chests easier to move. Tamper-proof screws attach the handle to the chest so you can chain your chest to a pole or other support to prevent theft.

**FULL LENGTH DRAWER PULLS** allow you the time-saving convenience of opening drawers without extra looking and reaching for a small centrally located handle.

**MOVABLE DRAWER DIVIDERS** — Customize the space inside drawers and the chest top tray to save time looking for tools. Create a special compartment for all of your tools to make it easy to spot missing tools and save tool replacement costs. These sturdy dividers stay in place during use, yet may be moved to keep your tool organization flexible.

**DRAWER LINERS** protect the drawer bottoms from abrasion, dirt and moisture, and prevent excess wear on tools.

**STANDARDIZED DRAWER SIZES** — Chest drawers are the same size as roller cabinet drawers, allowing you to interchange accessories used in drawers.

**CHEST BOTTOM REINFORCING RAILS** prevent the bottom of the chest from distorting up under heavy weights and prevent damage to the bottom, especially in mobile applications.

**EMBOSSED BACK** — These special raised ribs add strength to the cabinet without increasing weight.

**RUBBER MAT** — We include a rubber mat to provide you with a scratch-free non-slip work surface if you use your roller cabinet without a chest.

# MAGNUM FEATURES

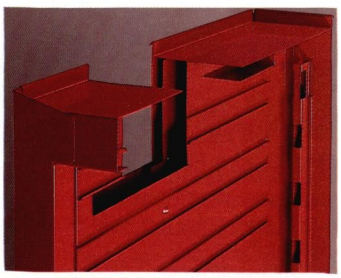
**AUTOMATIC SPRING LOADED LOCKING SYSTEM WITH DOUBLE-BITTED LOCK** — This handy feature can save you time and money. You can lock all drawers except the one you're working from, and when you're finished, simply push that drawer shut and it will lock automatically. The tamper resistant double-bitted lock keeps your tools safer than single-bitted locks.

**RECESSED DRAWER FRONTS** help prevent theft by making it difficult to get at the drawers with a pry bar.

**DOUBLE SLIDES ON LARGER DRAWERS** — All six-inch or larger drawers use four slides to support extra weight and work smoothly.

**2″ WIDE × 5″ DIAMETER CASTERS** — These heavy-duty casters make your loaded roller cabinet easier to move. They are two inches wide to add stability to the unit and prevent them from falling through most floor grates. Weld nuts are provided on the cabinet bottom for easy assembly. Two fixed and two swivel casters with toe lock brake.

**HEAVIER GAUGE CASTER CHANNELS** — One set of 14 gauge steel caster channels runs from side to side to completely reinforce the 16 gauge steel cabinet bottom. This insures that the cabinet will function properly under heavy loads.



**REINFORCED TOP** — Our cabinets have special stiffening braces welded to the inside top to help support the weight of a loaded chest without sagging.

## MAGNUM ACCESSORIES

**79001 Side Shelf**

For additional worksurface the side shelf provides about 2.4 square feet surface. The side shelf can be mounted level with roller cabinet top or mounted 14″ below cabinet top for versatility. Especially built for Magnum series with heavy-duty gauge steel.

| | |
|---|---|
| **19⅛″W × 17⅞″D** | **15 lbs.** |

**79003 Side Cabinet**

For extra storage capacity, try the Magnum Side Cabinet. This cabinet especially built for Magnum Series, features three roomy drawers and large bulk storage for larger supplies. Hangs by heavy-duty gauge bracket on cabinet side, includes double-bitted lock and drawer liners. Black vinyl top.

**9,707 cu. in. capacity**

| | |
|---|---|
| **21⅛″W × 18 1/16″D × 35 9/16″H** | **78 lbs.** |

**79005 Fender Cover**

| |
|---|
| **36″W × 27″D** |

Heavy-duty, leather-look vinyl fender cover.

# INDUSTRIAL/MACHINIST CHESTS

| 2 drawers | 22¼″ | 16⅝″ | 1½″ | |
| 3 drawers | 22¼″ | 16⅝ | 3⅛″ | |
| 1 drawer | 22¼″ | 16⅝″ | 4¼″ | |
| 1 drawer | 22¼″ | 16⅝″ | 6½″ | |

# INDUSTRIAL ACCESSORIES & MOBILE TOOL CART

**70002 Side Shelf**

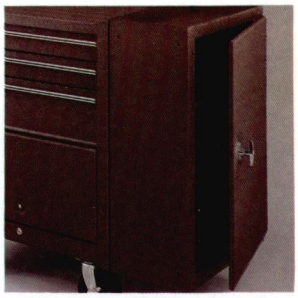
- Provides two square feet of work surface
- Flat when not in use

17⅞″ × 15⅝″ × 14″ — **10 lbs.**

**76666B 6-Drawer Accessory Cabinet**

- Increased capacity for small tool separation

9⅛″ × 12″ × 15″ — **26 lbs.**



**77747 Accessory Cabinet**

- Designed to hang on back or either side of our roller cabinets or hang on a wall.

17⅞″ × 11¼″ × 29⁵⁄₁₆″ — **32 lbs.**

## 50706SS MAGNUM "PLUS" 6-DRAWER MOBILE TOOL CART WITH BULK STORAGE COMPARTMENT

This unit is primarily designed for the mechanic who uses large bulk tools, test equipment and material containers that won't fit into units with all drawers.

| | Width | Depth | Height | Weight | Capacity |
|---|---|---|---|---|---|
| 50706SS | 46″ | 24″ | 30⅞″ | 352 lbs. | 15,810 cu. in. |

- Compartment has partial shelf to help with odd size products.
- Handle on compartment door telescopes into recess to keep from being snagged.
- Front to back dimension on drawers is 21⅞″ deep, which is almost 6″ deeper than many competitive units.
- "Quadra Level" steel ball bearing slides on all drawers provide maximum load capabilities with "Super Smooth" action.
- Extra heavy duty top and bottom made from 16 gauge steel, "Z" shaped full length reinforcing sections as well as 14 gauge caster channel makes this unit one of the strongest ever built.
- Full width bottom drawer is double reinforced to handle heavy large bulky tools.
- Priced at hundreds of dollars less than competitive units.

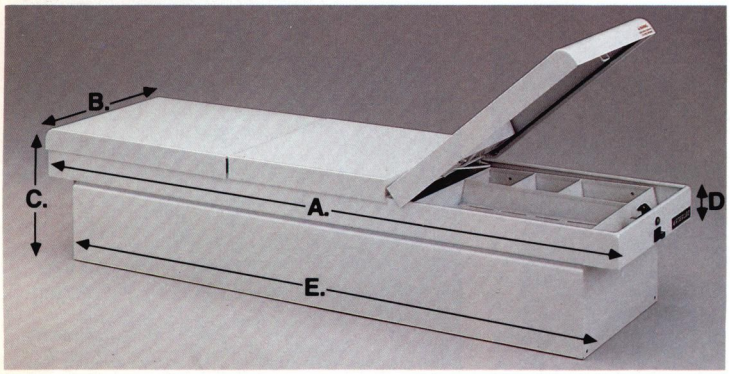
- Reinforced bottom corners and heavy-duty side carrying handles
- Strongest unit in the market

**2,584 cu. in. capacity**

| | |
|---|---|
| 32″ × 8½″ × 9½″ | 18 lbs. |

# TRUCK BOXES



## 14111, 14113, 14118, PICKUP UTILITY BOXES

We've got a lot to brag about in our pickup utility boxes. We offer three sizes so you can choose the right box to fit snugly within the box frame of your pickup. The sliding steel tray has four compartments for sorting tools and supplies. Then there's the silicone coated gasket to help keep dust and water out of the box and the cylinder locking system. White enamel finish.

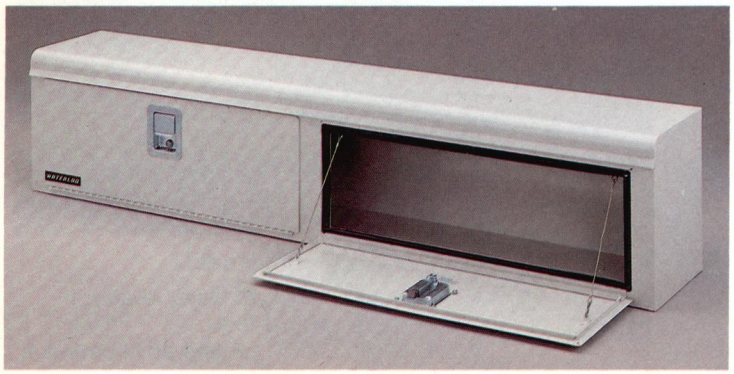
14111 fits 1967-up wide bed pickup: Ford, Dodge, Chevrolet, GMC, International
14113 fits 1967-up Chevrolet and GMC Stepside, Ford Flareside and Jeep Thriftside
14118 fits 1967-up Toyota, Datsun, Luv, Scout, Courier pickups

| | "A" | "B" | "C" | "D" | "E" | |
|---|---|---|---|---|---|---|
| **14111** | 70⅛″ | 20¼″ | 15½″ | 6¼″ | 62¾″ | 89 lbs. |
| **14113** | 55⅞″ | 20¼″ | 15¼″ | 6¼″ | 48½″ | 74 lbs. |
| **14118** | 61⅛″ | 20¼″ | 12″ | 6¼″ | 53½″ | 75 lbs. |

## 14269 INNERSIDE COMPANION BOX

This box attaches inside your pickup box and rides over the wheel well facing out for easy access to the compartments while standing on the ground. The push button lock latches when closed and locks with a key. A divided tray extends along the front so you can keep small tools separate from the bulk storage area. The silicone coated gasket protects against dust and water. Fits 1967 and up wide bed pickup trucks: Ford, Dodge, Chevrolet, GMC and International. White enamel finish.

| | | | | |
|---|---|---|---|---|
| **14269** | 64″ | 11¾″ | 12″ | 68 lbs. |



## 14178, 14179 TOP SIDE UTILITY BOXES

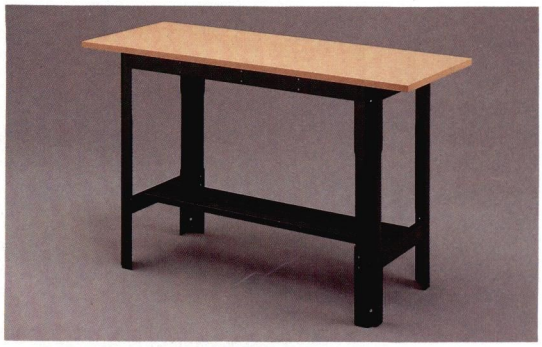
These boxes fit on top of either the right or left side of the pickup box for bolted-on secure storage without sacrificing your pickup's box space. Two double-panel doors with recessed handles and individual cylinder locks drop down for easy access when standing next to the pickup. Drip moldings and gaskets help keep out dust and water. Top-siders are available in both 78″ and 96″ sizes to fit either short or long wheelbase pickups. White enamel finish.

| | | | | |
|---|---|---|---|---|
| **14178** | 78″ | 13″ | 16½″ | 122 lbs. |
| **14179 long wheel base** | 96″ | 13″ | 16½″ | 140 lbs. |

# WORKBENCHES & ACCESSORIES

## USE YOUR IMAGINATION

A Waterloo work bench is more than just a work surface. It's a flexible work station you can custom design to suit your needs by starting with a basic bench and adding accessories. You add drawers, shelves, doors and convenience features to build the bench outfit that's just right for you.



### 90074 UTILITY WORK BENCH

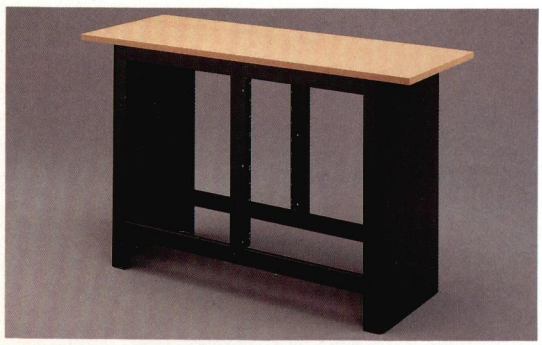
The 90074 makes work easier by providing a sturdy, stable work surface. A heavy-gauge steel frame with embossed cross members and legs supports a long lasting 1″ thick laminated top.

| | |
|---|---|
| **Top** | **54″ × 20¼″ × ⅞″** |
| **Base** | **42½″ × 18¼″ × 31½″** |

### 91174 STEEL TOP WORK BENCH

If your job requires a tough surfaced bench that cleans up easily, get our steel top work bench. A 14 gauge steel top attaches to the same sturdy frame used on the 90074.

| | | |
|---|---|---|
| **91174** | **6′ × 2′ × 32″** | **87 lbs.** |



### 90063 DELUXE WORK BENCH

Add up to two 91036 doors, twenty 90047 shelves, ten 91029 drawers, or four 91099 drawers (DOORS, SHELVES AND DRAWERS SOLD SEPARATELY).

| | |
|---|---|
| **Top** | **54″ × 20½″ × ⅞″** |
| **Base** | **44½″ × 18″ × 33″** |

### 91029 4″ WORK BENCH DRAWER

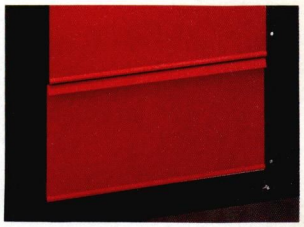
ADDS STORAGE AND SEPARATION CAPABILITY

| | |
|---|---|
| **16⅞″ × 15¾″ × 4½″** | **8 lbs.** |

### 91099 9″ WORK BENCH DRAWER

HANDLES YOUR BULKY ITEMS CONVENIENTLY

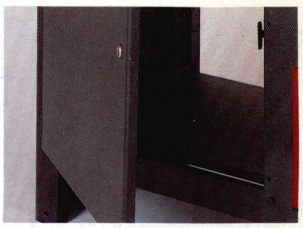
| | |
|---|---|
| **16⅞″ × 15¾″ × 9″** | **10 lbs.** |



### 91036 WORK BENCH DOOR

SECURES YOUR WORK BENCH STORAGE

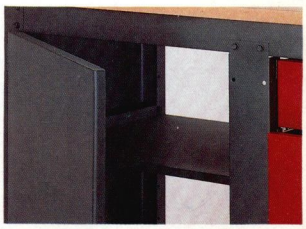
| | |
|---|---|
| **20¾″ × ¾″ × 24⅜″** | **9 lbs.** |



### 91047 WORK BENCH SHELF

MULTIPLIES WORK BENCH CONVENIENCE

| | |
|---|---|
| **18½″ × 16⅜″** | **4 lbs.** |



### 70211 4″ DRAWER DIVIDERS

MAKES SORTING SMALL PARTS A BREEZE

| | | |
|---|---|---|
| **2 pieces** | **15⁹⁄₁₆″ × 3⅞″** | **37 lbs.** |
| **2 pieces** | **16¾″ × 3⅞″** | **37 lbs.** |
